

AS AQA Biology
Investigating the Variety of Living Organisms, 3days

Students will carry out fieldwork in at least two different habitats and cover ideas about variation, classification and biodiversity from Unit 2 - The variety of living organisms.

for alternative [biology fieldwork](#) courses covering [A-level AQA biology fieldwork](#)

COURSE LENGTH

3 Days (2 nights with 6 teaching sessions)

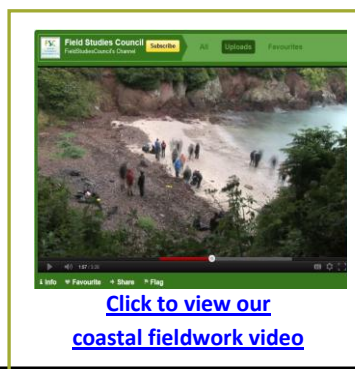

Monday / Wednesday	Tuesday / Thursday	Wednesday / Friday	OR	Friday	Saturday	Sunday
Arrive for lunch. Afternoon and evening sessions	Morning, afternoon and evening sessions	Morning session. Depart after Lunch		Arrive for evening meal. Evening session	Morning, afternoon and evening sessions	Morning and afternoon sessions.

COURSE CONTENT

Definitions and Concepts	Sampling and Experimental Techniques	Data Analysis and Presentation Skills	How Science Works (these areas will either be linked to fieldwork or discussion sessions)
<ul style="list-style-type: none"> Species concept Taxonomy Species Diversity 	<ul style="list-style-type: none"> Random sampling Dependent & independent variables Data collection 	<ul style="list-style-type: none"> Species Diversity Index Graphical techniques Mean, normal distribution and Standard deviation Risk assessments Methodical data collection Identifying and managing limitations 	<ul style="list-style-type: none"> Human impact on diversity

Investigative Skills Assessments (ISA) and Practical Skills Assessments (PSA) will not be carried out but by the end of this course students will have developed the following ISA/PSA skills:

- Changing a specific independent variable and measuring changes in the dependent variable
- Recognising, monitoring or keeping other variables constant
- Recognising accuracy, precision and reliability of data
- Risk management and ethical considerations
- Time management and methodical approaches
- Construction of raw data tables
- Choosing appropriate graphs
- Recognising correlations, causal relations and the tentative nature of data
- Drawing valid conclusions using wider biological knowledge and understanding
- Identify limitations and assessing relative effects on reliability, precision, conclusions
- Suggestions for further studies and of how limitations be reduced

**External Recognition of Quality**

All our centres have either been awarded the Quality Badge by The Council for Learning Outside the Classroom, or are awaiting assessment. The badge is awarded to organisations that have demonstrated that they consistently deliver high quality teaching and learning experiences and manage risk effectively. This means that you will have to complete less paperwork when visiting our centres

LEARNING OUTCOMES/OBJECTIVES

Learning Objectives	Learning Outcomes
<ul style="list-style-type: none"> • Provide students with an understanding of key ecological concepts • Provide students with experience of the ecological techniques and emphasise the justification and limitations of those techniques • Give opportunities for students to apply those skills in a variety of habitats including one terrestrial and one aquatic habitat • Show how skills and concepts can be transferred to other habitats and allow students to experience a range of experimental designs and establish the need for replication and controls • Explore a range of graphical and statistical techniques for the analysis of ecological data and make clear the links between experimental design and methods of analysis • Emphasise the justification and limitations of different techniques for the presentation and analysis of data • Give students increasing responsibility for the design of the sampling to be undertaken each day • Explore the synoptic links between ecological studies and other areas of the specification 	<p>By the end of a course we expect all students to:</p> <ul style="list-style-type: none"> • Have gained an understanding of the appropriate terminology used in ecological questions • Have demonstrated an ability to analyse and interpret ecological data using a variety of graphical and mathematical skills • Be able to use their findings in the context of standard ecological concepts and make synoptic links to other areas of their specification • Be able to transfer their skills and knowledge to the study of new habitats and new ecological questions <p>We also hope that students will:</p> <ul style="list-style-type: none"> • Have developed an understanding of, and respect for, living organisms in their natural habitats • Be able to appreciate the rich biodiversity of life within all types of habitats in the UK. • Explore how personal, social, moral and cultural issues can be put into a wider environmental context

High Quality teaching

The teacher delivering the content plays a vital role in ensuring successful learning outcomes are achieved.

This is why every FSC Centre has taken great care in developing a qualified team of highly trained and CRB checked field teachers working full time, all year round.

Not only are they experts, they are gifted teachers with a real passion for the subject being taught. FSC field teachers are the reason why many schools return year after year.

Protecting fieldwork opportunities for everybody

Growing pressures on outdoor learning has led the FSC to take on an important role; championing the rights and opportunities for people of all ages to experience the environment at first hand.

The FSC has led in campaigns to reverse the continuing decline in fieldwork within secondary schools and to build opportunities for out-of-classroom learning.

As a registered charity, the FSC receives no statutory funding. It relies solely on fees charged for courses and membership. Therefore, by visiting an FSC Centre not only are you receiving a high quality educational experience for your students, you are also helping to protect fieldwork opportunities for everybody.

FSC CENTRES

This course is offered at our residential centres listed below, set in some of the most stunning locations in the UK.

FSC Centres that offer this course:

BL	Blencathra	Tel: 01768 779 601
DF	Dale Fort	Tel: 0845 330 7365
DG	Derrygonnelly	Tel: 028 686 41673
FM	Flatford Mill	Tel: 0845 330 7368
JH	Juniper Hall	Tel: 0845 458 3507
KD	Kindrogan	Tel: 01250 870 150
MT	Malham Tarn	Tel: 01729 830 331
NC	Nettlecombe	Tel: 01984 640 320
OR	Orielton	Tel: 0845 330 7372
PM	Preston Montford	Tel: 0845 330 7378
RC	Rhyd-y-creuau	Tel: 01690 710 494
SL	Slapton Ley	Tel: 01548 580 466

TO BOOK THIS COURSE, SIMPLY:

1. Choose the time of the year you would like to attend
2. Pick the centre/centres of interest
3. [Check availability online](#) or contact head office using the details at the bottom of the page or contact the centre of your choice

**Please note to book this course the minimum size of your group must be 12 students and 1 member of staff*

FSC courses are classed as educational by HMRC and are therefore VAT exempt; **we don't charge you VAT**. This can save you time and effort paying it and then attempting to claim it back, if you are eligible to do so.

Included within the course price:

- Expert tuition by fully trained staff
- Rigorous and proven health and safety procedures including 24 hour emergency cover
- Access to risk assessments
- Full board (residential visits)
- Specialist equipment and exclusive access to specially developed resources
- Free places for visiting staff
- E-mail support before and after the course (on request)
- Personal and travel insurance

Please remember travel to the field centre and to fieldwork sites is not included in the course fee.

FSC offers a number of courses covering [Science field trips](#), [biology fieldwork](#), [AS / A level biology fieldwork](#) as well as [geography field trips](#) and [geography fieldwork](#). Please visit our website for further information.
